TECHNICAL SKILLS

- **Frontend:** React.js & Next.js, TypeScript, JavaScript, Redux, HTML/CSS, Tailwind CSS, MUI
- **Backend:** Node.js, Express.js, JWT, REST API, SQL, MongoDB, Microservices
- **Cloud:** AWS, Firebase, Docker, Kubernetes, GitHub Actions, Nginx, CI/CD, SSH
- **Tools:** VS Code, Postman, Notion, Figma, Adobe XD, Linux CLI

WORK EXPERIENCE

Navgurukul - Software Development Associate

Oct 2025 - Present

- Mentored BCA students in Full Stack Web Development (MERN stack), guiding them through concepts in MongoDB, Express.js, React, and Node.js.
- Supported students in building and deploying real-world web applications, assisting with project architecture and implementation.
- Conducted code reviews, debugging sessions, and technical discussions to improve students' coding practices and problem-solving skills.
- Provided hands-on project guidance and technical mentorship, helping students strengthen practical development skills.

Fluencer Digital PVT LTD, Remote – Full Stack Developer Intern

Apr 2025 – Sep 2025

- Built and deployed an AI-powered content generation platform YDD using Next.js, Node.js, Tailwind CSS, and MongoDB, integrating OpenAI APIs for dynamic content creation and Stripe Checkout for subscription management.
- Automated daily content delivery via Node-Cron and Node-mailer, implemented secure JWT and Google OAuth authentication, and deployed the platform on AWS EC2 for production use.
- Transitioned into a full-stack role on a clinic and e-commerce platform, developing key modules for role-based access, appointment scheduling, membership plans, and product ordering with Razor-pay integration.
- Contributed to backend API design, admin panel features, and user dashboards in a fast-paced agile team using GitHub and Postman, delivering scalable systems across healthcare and commerce domains.

Freelance Frontend Developer at SIFMS

June 2024 – Sep 2024

- Developed and deployed a responsive web application for South India Facility Management Services (SIFMS) using HTML, CSS, JavaScript, and Bootstrap, streamlining facility management operations with a modern, user-friendly interface.
- Integrated automated testing tools to ensure application stability and maintain high code quality, while managing version control and team workflows through Bitbucket.

PROJECTS

- **Prescripto (Appointment Booking App) – [GitHub](#):**
Developed Prescripto, a responsive doctor appointment booking platform with role-based dashboards for doctors and admins, real-time booking, and secure authentication using React.js, Tailwind CSS, Node.js, Express, and MongoDB, ensuring a smooth and reliable user experience.
- **Disaster Relief App – [GitHub](#):**
Developed a full-stack disaster relief and missing person reunification platform with real-time updates, image-based reporting, donation pledging, and secure JWT & OAuth authentication using React.js, Node.js, Express, MongoDB, and Socket.io, deployed on Vercel and Render for scalable and reliable access.

EDUCATION

- **College:** Dayananda Sagar University, Bengaluru
2023
- **Branch:** Master of Computer Application
8.48

CGPA:

CERTIFICATIONS

- **Generative AI Skills for Developers** - from LinkedIn Learning, acquiring expertise in AI model development and deployment.
- **AWS Essential Training for Developers** – from LinkedIn Learning, developing expertise in AWS Services, cloud computing and development.
